

Dear Job Aspirant,

We wish to connect with you for below position of **Sr Software Engineer (iOS)**

- Designation: **Sr Software Engineer**
- Qualification: Bachelor's degree in computer science, IT, E&TC, Mechanical or equivalent.
- Location: Pune
- Experience: 3 – 5 years

Company Profile :

Founded in 1999, Softdel (a UNIDEL company) connects devices, enterprises, and people. Our distinctiveness lies in simplifying enterprise connectedness in smart buildings and smart factories creating unprecedented benefits for our customers and their eco-systems. Headquartered in Stamford, CT, USA, with offices in Japan, and India, we deliver domain expertise and technology-driven solutions to help companies turn digital challenges into opportunities. Our two-decade-long product engineering experience of serving global leaders in the automation & controls industry has catapulted Softdel to an enviable position in the Industrial and Buildings IoT value chain.

JOB Description:

Overview

We are seeking an experienced **iOS Mobile App Developer** to maintain and enhance native iOS applications. The role focuses on building scalable, high-quality mobile solutions using Swift, integrating backend services and connected systems, and delivering intuitive user experiences following modern iOS development practices.

Responsibilities

- Maintain, troubleshoot, and optimize existing native iOS applications.
- Design, develop, and deliver new features using established architecture patterns such as **MVC, MVVM, and Repository**.
- Collaborate closely with product owners, designers, and QA teams to deliver high-quality releases.
- Integrate and maintain **RESTful APIs**, backend services, and third-party SDKs.
- Develop modern, responsive user interfaces using **UIKit, Auto Layout, and SwiftUI (where applicable)**.
- Manage local data storage using **Core Data, SQLite, and UserDefaults**.
- Implement and maintain real-time features such as device control, automation, and monitoring.
- Support and enhance notification workflows and background processing mechanisms.
- Write clean, maintainable, and well-documented Swift code following iOS best practices.
- Participate in code reviews and contribute to continuous improvement and technical excellence.
- Provide post-release support including bug fixes, performance optimization, and stability improvements.
- Experienced in implementing secure development methodologies, ensuring robust protection of sensitive data and systems integrity

Requirements

- Bachelor's degree in Computer Science, Engineering, or equivalent practical experience.
- **3 to 5 years** of hands-on experience in **native iOS application development using Swift**.
- Strong understanding of iOS architecture patterns (**MVC, MVVM, Repository**).
- Proficiency with **Xcode, Swift Package Manager / CocoaPods, and Git**.
- Experience with networking and data handling frameworks such as:
 - **URLSession, Alamofire**
 - **Codable, JSON parsing**
- Experience with local persistence technologies:
 - **Core Data, SQLite, UserDefaults**
- Solid understanding of **asynchronous programming**, multithreading, and memory management (ARC).
- Familiarity with Apple's app lifecycle, background execution, and App Store guidelines.
- Understanding of secure coding practices and mobile data privacy (e.g., GDPR principles).
- Strong analytical, debugging, and problem-solving skills.
- Good communication skills and ability to work effectively in cross-functional, international teams.

Nice to Have

- Experience with **SwiftUI, Combine, and modern iOS frameworks**.
- Exposure to **Bluetooth, Wi-Fi, or IoT device integration**.
- Familiarity with **push notifications, background tasks, and real-time data updates**.
- Experience in **multi-language applications, localization, and RTL support**.
- Knowledge of **OTA updates, crash reporting, and analytics tools**.
- Experience with **CI/CD pipelines for iOS applications**.

Regards,
